WORK EXPERIENCE

AirDawg Labs

April 2026 – May 2026

AI Systems Evaluation Intern

India (Remote)

- Designed **Docker-based** CLI benchmark tasks to evaluate **AI coding agents** across real world software engineering workflows, ensuring reliable execution, reproducible testing, and consistent benchmark results.
- Built **reference solutions**, automated test suites, and evaluation pipelines using **Docker**, **Cursor**, and AI assisted development workflows to validate correctness, scalability, and benchmark consistency.
- Improved benchmark reliability through structured testing, prompt engineering, and failure analysis of **LLM agents**, identifying edge cases, improving evaluation quality, and reducing inconsistent agent behavior.

Newgen Software Technologies Limited

June 2026 – Present

AI Engineer Intern

India (Remote)

- Built an **enterprise semantic search platform** enabling natural-language retrieval across **PDF**, **DOCX**, and **TEXT** documents using dense vector embeddings and semantic similarity search.
- Engineered document ingestion, text extraction, semantic chunking, embedding generation, and **MongoDB Atlas Vector Search** pipelines for context-aware retrieval with source attribution.
- Implemented **OCR** asynchronous document processing, grounded AI answer generation, citation validation, and resilient fallback retrieval for reliable enterprise document search.

PROJECTS

GitHub Issue → PR Autonomous Coding Agent — *Next.js, FastAPI, PostgreSQL, Redis*, [GitHub](#) — [Live](#)
Docker, OpenAI

- Built an autonomous engineering agent that transforms bounded **GitHub issues into pull requests** through repository analysis, structured planning, sandboxed implementation, verification, repair, and human approval.
- Engineered durable orchestration using **FastAPI**, **PostgreSQL**, **Redis**, **Dramatiq**, **SSE**, and **Docker**, supporting retries, cancellation, immutable repository context, GitHub App authorization, and secure execution.

Contexta — *React, TypeScript, Node.js, MongoDB Atlas, Vector Search*

[GitHub](#) — [Live](#)

- Built an enterprise semantic search and grounded-answer platform for **OCR fallback**, resilient multi-tier retrieval, streaming grounded answers, citation validation, and source-aware semantic search with contextual passage retrieval.
- Implemented asynchronous ingestion, **MCP server** and approval workflow with controlled file-system tools, policy evaluation, and backend APIs for secure, auditable agent interactions.

ACHIEVEMENTS

- Secured **Global Rank 294** in **CodeChef Starters 225 (Rated)**.
- Solved **1000+** problems across **LeetCode**, **Codeforces**, **AtCoder**, and **CSES**.
- Achieved a **1760+** **LeetCode** rating and a **2★ CodeChef** rating.

TECHNICAL SKILLS

Languages	C++, Python, JavaScript, TypeScript, SQL
Frameworks	React, Next.js, Node.js, Express, Fastify, Tailwind CSS
Databases	PostgreSQL, MongoDB, Redis, Pinecone
Tools	Docker, Git, GitHub, BullMQ, AWS (EC2, S3), GitHub Actions

EDUCATION

Maharaja Surajmal Institute of Technology (MSIT)

2023 – Present

B.Tech in Information Technology, CGPA: 7.94

Delhi, India
